

# RD-100EX

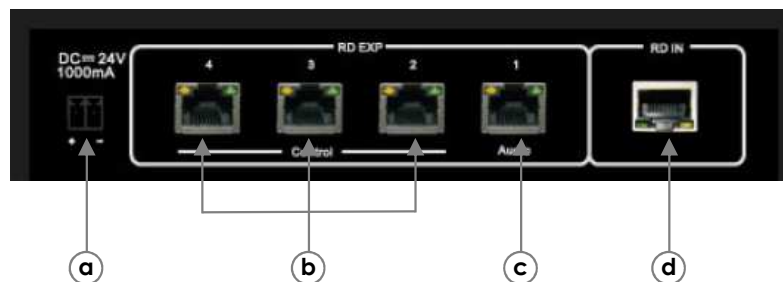

Remote Controller  
Expander for MATRIX-A8

## Features

- 1 digital port In (from MATRIX-A8)
- 1 digital port Out for audio plus control (to RV-1000 and RV-100D)
- 3 digital port Out for control only (to RVA-200 and RIO-200)
- 24V DC power supply

The RD-100EX is a port expander featuring a star connection for the controllers. This interface can be used when daisy chain between devices is not possible or when the controllers are far away from the host.

- a. 24V DC power supply
- b. RD connections for RV-1000 and RV-100D (control data of the remote devices only)  
Up to 8 controllers per ports can be daisy chained
- c. RD connection for RAV-200, RIO-200 and RPM-200 (control data plus digital audio of the remote devices)
- d. RD connection with MATRIX-A8
