

Features

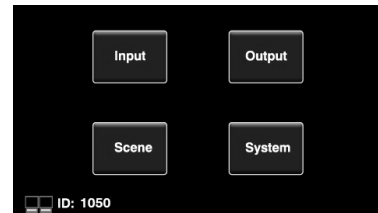

- Volume control of MATRIX-A8 output channels
- Input / Output signal routing
- 4.3" touch screen
- Direct power supply by network cable
- RD port IN, for connection to MATRIX-A8
- RD port LINK for daisy chain connection
- 100 m cable length

The RVC-100D is a wall mount 4.3" touchscreen volume controller.

The volume control can be assigned to any output of the host. It can also route any input to any output like, similar to the Editor Software of MATRIX-A8.

The device can set up four different sub menu pages, like Input, Output, Scene and System.

In the Output section, the routing function can assign any input to any output. Volume and mute can be adjusted and visually monitored.

a. RD port IN

Connection to MATRIX-A8. The maximum CAT 5e cable length is 100 meters.

b. RD port LINK

Daisy connection for additional remote controller (8 controllers max).
