

Features

- Plug and play
- Transparent transmission through LAN
- Audio parameters setting by PC software

IP-LAN is a module of communication over a LAN for audio devices equipped with DSP. The main application consists of parameters setting with a PC or a tablet for products like active speakers, digital mixers, amplifiers and digital audio platforms. IP-LAN supports a transparent transmission through LAN environment. It is stable and reliable for a high speed full duplex transmission.

Specifications

IP-WM / IP-WSL

Support transparent transmission of data through LAN

Support break self-test and reconnection

Stable, reliable and high speed full duplex data transmission

Set network parameters, serial port parameters and other related parameters by PC web browser

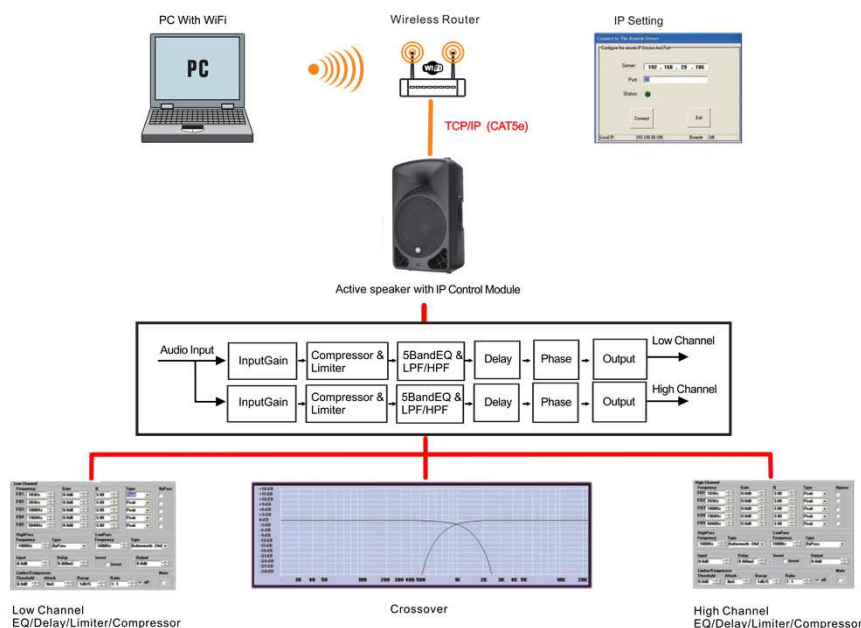

Set audio parameters by PC software

DHCP function

Support TCP, UDP, HTTP, ICMP, ARP protocol

Baud rate: 1200 ~ 115200

Specifications subject to modification without notice
