

VAS-64/ VAS-100EOL/ VAS-100RVC

Voice Alarm System Stations and Controllers

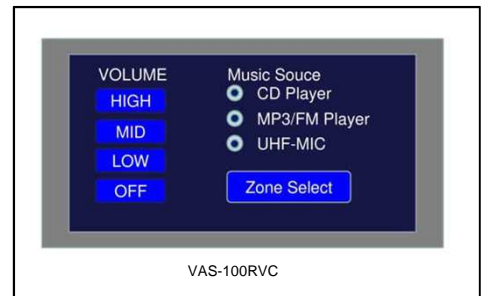

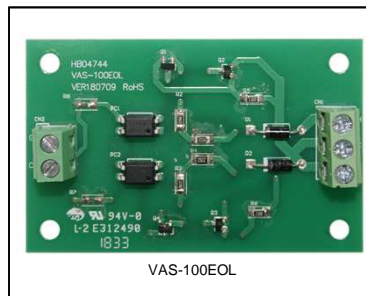

Features

- Fireman Mic. Station
- Paging Mic. Station
- Expander Station
- Speaker Line Detection
- Remote Zone Volume Control

The Voice Alarm System (VAS) includes communication terminals and controllers. There is the VAS-64 series which offers communication stations including a dedicated station for firemen (VAS-64RMF), a paging station (VAS-64RPM) and an extension station for additional users (VAS-64EX).

The VAS-100EOL is a loudspeaker line controller that checks whether the sound is properly broadcast in each zone. It is connected at the end of the line and reports any error to the host amplifier.

VAS-100RVC is remote LCD touch screen for source selection and volume control.

VAS-64RMF

- VAS-64RMF is connected to VAS-3600 and VAS-3600EX.
- It features emergency alarm, emergency evacuation broadcast, and emergency alarm reset.
- The combination of VAS-64RMF and VAS-64EX enables emergency broadcast to specific zones. Zone information can be set via PC software.
- 16 Mode memory for storing audio files (.mp3/.wav can be recognized).
- Speaker and microphone detection function, can be turned on or off through the PC software.

VAS-64EX

- VAS-64EX is used for VAS-64RMF or VAS-64RPM zone extension.

VAS-64RPM

- VAS-64RPM is connected to VAS-3600 and VAS-3600EX.
- VAS-64RPM button can be set for two functions: zone selection and message playback, which can be set by PC software.
- VAS-64RPM broadcasts to specific zones, zone information can be set via PC software.
- 16 Mode memory for storing audio files (.mp3/.wav can be recognized).
- Microphone detection function, can be turned on or off through the PC software.

In addition to the above products, the Voice Alarm System includes the following devices:

- VAS-3606 : Host Amplifier
- VAS-3606EX : Host Amplifier Expander
- VAS-3600SA: Standby Amplifier
- VAS-100DS: Backup Power Supply
- VAS-100BGM: MP3 Player with Timer
- VAS-100NET : Network Manager
